Aqua Trol Electronic Chlorine Generator specifications:

- PMRA approved
- Microprocessor-based electrolytic chlorine generator
- Selectable automatic superchlorinate function
- Digital salt level display & seven diagnostic LEDs
- Generates chlorine for swimming pools up to 18,000 gallons
- Exclusive patented Turbo Cell® design
- Single unit for 120 VACOL 50/60Hz input
- Quick and easy installation in less than 30 minutes
- 24 hour integrated timer for filter pump

Total SANITIZATION through the POWER of SALT

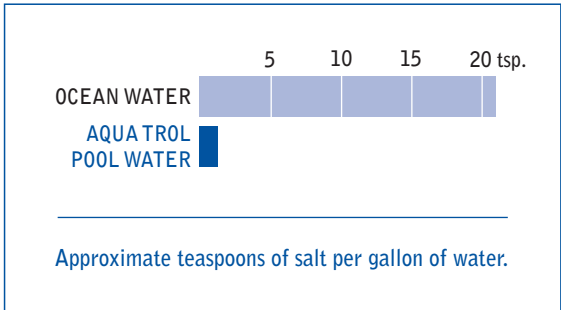

A little salt goes a long way

The advanced technology of Aqua Trol allows it to operate efficiently on approximately one teaspoon of salt per gallon of pool water. Once the salt is added to your pool, you'll rarely need to introduce more. The easy-to-read control box displays information regarding Aqua Trol, including operation status and salt level.

Never buy, mix or measure chlorine again

It's possible with the Aqua Trol® Electronic Chlorine Generator. Aqua Trol delivers 100 percent of the sanitization your water needs through common table salt, not factory-created chlorine. Just natural, refreshing water you can swim in without limitation.

Aqua Trol requires a minimal amount

Turbo technology

The science behind this safe technology lies within the Turbo Cell® that attaches to the control box. As pool water passes through the cell, Aqua Trol control unit generates a safe, low-voltage current that converts the salt in the water into fresh, pure chlorine. This water is then evenly dispersed throughout the pool via the return jets. The process is as effective as it is safe for added convenience and peace of mind.

The advantages of switching to the Aqua Trol Electronic Chlorine Generator:

- Quick and easy to install in new or existing pools
- Water is soft, silky and sparkling
- Eliminates dry skin, irritated eyes and discolored hair problems associated with factory-created chlorine
- Requires roughly one teaspoon of salt per gallon
- Safe on all pool surfaces
- 5-year limited warranty*

The Aqua Trol Control Box mounts near your system for easy-to-read operational status.

Water passes through your pump, filter and heater before entering the Aqua Trol Turbo Cell. Freshly purified water is then returned directly to your pool.
